By Christine Vasiliou Zientak

The kitchen layout for our 2006 Saratoga Showhouse was designed by Rich Pennock of Pennock's Kitchens & Bath Showroom in Queensbury. The cabinets are by Diamond Cabinets and feature solid, raised-panel maple doors and drawer fronts with an almond glaze finish. The layout includes Diamond's newest innovation: the supercabinet that features adjustable all-wood shelves, generous door storage and full extension roll-out trays. Completing the cabinetry is a double dentil crown molding at the top and a light rail on the bottom, with low voltage lighting in each location.

The solid surface countertops in the kitchen are from the LG HI-MACS Volcanics collection. LG HI-MACS Acrylic Solid Surface is a solid homogeneous slab that is resistant to stains, making it an ideal material for surfaces that are subject to moisture and heavy wear. The nonporous surface rejects the growth of bacteria making it the logical choice in areas of food preparation, even over granite. Our 9" deep, double-bowl, solid-surface sink is made of the same HI-MACS material in a color complimentary to the cabinetry.

The fixture is a Moen Vestige brushed nickel faucet. Glens Falls Tile & Supply is the source for the 19" x 19" ceramic tile flooring. The rust and tan tone tile sets the color palette for the living areas.

•••••

The centerpiece of our master bathroom is an American Standard Reminiscence slipper soaking tub. The accompanying faucet is in polished chrome and features a bypass valve allowing use of the personal shower handle. The double vanities, by Diamond Cabinets, are finished in a parchment glaze and topped off by a Tereastone one-piece surface. Moen faucets from the Kingsley collection in polished chrome are used on the sink top. Our shower is a 4' wide, acrylic, one-piece unit with a dome top and recessed light. A matching Reminiscence toilet by American Standard completes the bathroom.

The ceramic floor tile was provided by Glens Falls Tile & Supply. The center of the bathroom floor has 12" x 12" tile in blue and gray tones. It leads to a subway tile border around a mosaic center that highlights the slipper tub.
